A color calibration target, likely a Munsell Color Services Lab chart, featuring a grayscale step wedge and color patches. The grayscale steps are labeled 1 through 10, with corresponding numerical values for density and colorimetric data. The color patches are labeled with their respective Munsell colorimetric values (L*, a*, b*) and are arranged in a grid.

A color calibration chart featuring a grid of color patches. The patches are arranged in two rows. The top row contains patches labeled 1 through 10, and the bottom row contains patches labeled 11 through 20. Each patch is a small square with a specific color and a numerical value printed next to it. The values range from 1 to 20, corresponding to the patch numbers.

A color calibration chart featuring a grid of color patches. The patches are arranged in two rows. The top row contains patches labeled 1 through 10, and the bottom row contains patches labeled 11 through 20. Each patch is a small square with a specific color and a numerical value printed next to it. The values range from 1 to 20, corresponding to the patch numbers. The chart is used for ensuring color accuracy in digital imaging and printing.

A close-up photograph of a document featuring a grid of numbers. The visible numbers are arranged in two rows: the top row contains '20', '22', and '25'; the bottom row contains '26', '27', and '28'. Above the numbers, there is some faint, partially legible text that appears to be 'FEE' repeated several times.
